

Golf Car Winter Storage

(Includes *All Club Car, Yamaha or E-Z-GO except RXV*)

1. Check and fill batteries with water as needed.
2. Make sure all battery cable connections are clean.
3. Charge fully.
4. Disconnect charger after charging.
5. Turn regenerative switch to Tow/Maintenance.
6. **If UNABLE to get to car during the winter months:**

Disconnect the positive and negative of the battery pack. Disconnect the charger after charging.

If you ARE ABLE to get to the car during the winter months:

Leave the positive and negative of the battery pack connected and charge the batteries 2 to 3 times during the winter months. Disconnect charger after each charging.

Remember: A fully charged battery will NOT freeze in winter temperatures.
